YOUR DATA IS AN ASSET. ENSURE YOUR DATA IS WHERE IT IS MEANT TO BE AND NOWHERE ELSE

The world has changed, no longer is the network the perimeter of your company, your data is out there - on mobile devices, with business partners and in the cloud.

Taking a data centric approach to security and data exchange means that irrespective of how the data travels or where it ends up, it is protected, managed and audited.

DATA CENTRIC SOLUTION EXPERTISE

Our experience is that your data gives you competitive advantage. The security, visibility and management of that data will become critical to your business, if it is not already, that is why we work with only the leading vendors who build scalable and feature rich products.

- **DATA CLASSIFICATION** All data is not created equal, ensure both humans and systems can identify the context of data and files and enforce correct policy.
- **DATA ACCESS** Ensure & Audit that only the right people have access to the right data at all times: Windows, SharePoint, Exchange, Directories, UNIX/LINUX
- **SSH KEY MANAGER** Deliver effective secure shell key management involving 3 core capabilities: Discovery, Management, Monitoring & Reporting.
- **EMAIL ENCRYPTION** End-to-end security for email & attachments, inside the enterprise to the desktop, at the enterprise gateway and across mobile devices.
- **FILE ENCRYPTION** No Key Management. Protect without disrupting work flow and business processes. Anywhere they travel, including within removable media, remote clients, and collaboration portals.
- **DATA LOSS PREVENTION** A data centric and risk based approach to protecting data, delivering: risk visibility and measurement, risk prioritization, integrated policy management and control, integrated data event aggregation, reporting and forensic data event capture and case management in a single, fully integrated platform.
- **SECURE & MANAGED FILE TRANSFER** Centrally manage, schedule and automate the movement of data internally and externally - quickly, efficiently and securely.

DATA FEEDS YOUR COMPANIES DECISION MAKING, CROSSING BUSINESS PROCESSES AND INTERACTING WITH PEOPLE AND BUSINESS PARTNERS.

Identifying, securing, exchanging and gaining visibility of the journey of data is not an easy task, particularly when most technology products are point solutions. We truly understand the journey of your data, the role of people, the importance of policies and the fluid nature of business processes. That is why we take a holistic look at your company, yes we can solve a pain point for you today but longevity exists in understanding the bigger picture then providing solutions that can be built on and joined up.

OUR SOLUTIONS

WE SECURE THE JOURNEY OF YOUR DATA

DATA CREATION

DATA IN USE

DATA AT REST

DATA INTEGRATION

DATA WORKFLOWS

DATA EXCHANGE

ACROSS 4 DATA SOLUTION AREAS - IDENTIFY, EXCHANGE, SECURE AND VIEW

- Handover of documentation
- Administrator training
- Customer specific use cases
- Compliance issues
- Backup & Recovery
- Support channels

IT PRODUCTS DON'T SOLVE BUSINESS ISSUES. THE RIGHT BLEND OF PRODUCTS AND SERVICES DELIVERED IN THE WAY THAT FITS YOUR BUSINESS MODEL SOLVES BUSINESS ISSUES.

That is why we spend so much time recruiting, developing and retaining our people. As you work with us, the technical lead running the pre sales engagement and taking time to really understand your business will be the same person that leads the implementation team. Our customers appreciate the continuity this delivers, we like the assurance that the project or professional services engagement will be delivered on time with minimal hassle.

ONSITE, CLOUD, SAAS, HOSTED, MOST OF OUR SOLUTIONS CAN BE DELIVERED TO SUIT YOUR BUSINESS.

OUR CUSTOMERS

"I would like to express my thanks for one of your engineers, who assisted us with the implementation. It's refreshing to have a dedicated professional that can take you on a journey from pre-deployment to go-live in a way that it felt like a walk in the park. Neil not only communicated effectively, but provided a level of documentation and technical prowess that left us here very happy."

Steven Maccioli, Prospects Services

"HANDD's support was excellent. At last we have a highly secure and simple means to transfer files efficiently over the internet, and I know we can rely on HANDD Business Solutions."

Oliver Rhodes, London Borough of Enfield

WITH A GLOBAL FOOTPRINT IN THE UK AND ASIA. OUR HISTORY OF DESIGNING, IMPLEMENTING AND SUPPORTING OVER 500 ENTERPRISE SOLUTIONS ENABLES US TO TALK FROM A POSITION OF EXPERIENCE.

But let's face it, what we say about ourselves is insignificant in comparison to what our customers say about us.

To view a more complete list of some of our clients in the UK, Europe and Asia please visit www.handd.co.uk/about-handd-business-solutions/our-customers/

"I just wanted to say what a great experience I have personally had dealing with HANDD. I was shown an excellent demonstration of the product via webex by an engineer, Sales have been on the ball every step of the way getting software ordered and ensuring my comms have been answered appropriately, and I have just had my first experience of your support (Jonathan answered my query) which was absolutely spot on. Not only was the question answered but the solution was provided by way of a zipped up project I just imported and now I know more about the system as well."

Gavin Singh, Ann Summers

"I've just had an update call with the Project Team you are currently working for. They feel HANDD have done a fantastic job providing a service above and beyond what was initially expected."

Jodie Mckane, Detica

"The implementation of the system was completed expertly in a very short period of time by HANDD, and without any major problems."

Chris Petrie, Stephenson Harwood

**WE ARE THOUGHT LEADERS ON DATA SECURITY AND FILE TRANSFER.
OUR PROFESSIONAL AND PRACTICAL APPROACH ENSURES SUCCESS.**

Classifying, protecting and securely exchanging data can be a complex, overwhelming task. You need the independent advice and expertise of data security and file transfer experts. You need HANDD.

HANDD works closely in partnership with leading brands in Managed File Transfer, Data Loss Prevention and Data Security but, distinctively, we pursue independent relationships. Our only loyalty is to you, our clients.

That's why so many organizations and enterprises trust us to give them the solution they need, from the vendors that are best suited to the job.
