PROTECTING BUSINESS DATA – ANYTIME, ANYPLACE, ANYWHERE

MOBILE

MOBILE CLASSIFIER – DATA CLASSIFICATION FOR THE WIDEST RANGE OF MOBILE PLATFORMS

Whilst enterprise mobility brings many benefits, it comes with an increased risk to sensitive data resulting from personal and corporate data being accessed from the same device.

Although many organisations recognise the importance of data classification as part of a layered security approach, mobile devices aren't always covered and you need to ensure your sensitive business data is safe from loss or leakage, no matter how or where your employees choose to access it.

Boldon James **Mobile Classifier** protects business data consistently across a diverse range of mobile platforms, allowing organisations to exploit the benefits of enterprise mobility without the accompanying risks.

Mobile Classifier extends message classification to handheld devices such as smartphones and tablets, providing a consistent classification experience to the widest range of mobile platforms, including iOS, Android and Windows Phone.

By separating personal and business data, Mobile Classifier enables organisations to prevent email mishandling and reduce the likelihood of data leakage. As with other Classifier products, Mobile Classifier adds relevant visual and metadata markings to email messages, ensuring consistent actions by complementary security solutions such as Encryption, Data Loss Prevention and Digital Rights Management. It can also be flexibly deployed, with both on-premises and cloud mailbox solutions such as Microsoft Office 365.

ANDROID

Windows Phone

MOBILE CLASSIFIER FEATURES:

- ▶ **Quick Classification**
Provides a simple and convenient single-click mechanism to label emails on devices where screen real-estate is limited.
- ▶ **Customised Markings**
Mobile Classifier can apply various different markings to an email based upon the selected label.
- ▶ **Data leakage checks**
A set of policy-based checks can help prevent inadvertent data loss, by providing warnings or blocking actions.
- ▶ **Advanced controls**
A set of advanced checks with configurable outcomes such as warnings or blocking actions.
- ▶ **Simple configuration**
Straightforward policy configuration is achieved through the unified policy management function of the Classifier Administration console.
- ▶ **Mobile Device Management (MDM) compatibility**
Works with MDM solutions to increase the security of information stored on mobile devices by ensuring it cannot be accessed if the device is lost.
- ▶ **Cloud and on-premises compatibility**
Interacting with Microsoft Exchange platforms using the standard Exchange Web Services (EWS) interface, Mobile Classifier can be deployed on-site or in a hosted environment and is fully compatible with Microsoft Exchange Online, part of Office 365.

MOBILE CLASSIFIER BENEFITS

- ▶ Supports the widest range of mobile device platforms
- ▶ Segregates business and personal email to prevent email mishandling
- ▶ Prevents inadvertent data loss
- ▶ Ensures a common classification experience across all devices
- ▶ Provides a full range of business email functions with fully integrated classification support
- ▶ Performs policy enforcement on device with immediate user feedback
- ▶ Offers simple configuration
- ▶ Compatible with leading Mobile Device Management (MDM) solutions
- ▶ Compatible with cloud and on-premises mailbox solutions
