

CENTRIFY SERVER SUITE SUPPORTED PLATFORMS

Centrify Server Suite, Standard Edition

Centrify Server Suite, Standard Edition, centralizes authentication and privileged user access across disparate systems and applications by extending Active Directory-based authentication, enabling use of Windows Group Policy and single sign-on.

The following table lists all systems and system versions for which the Windows/Linux/UNIX Agent is available — more platforms than any other solution. Versions listed as supported are available for immediate download; just submit an evaluation request.

Centrify for Java/J2EE and Web

Centrify DirectControl delivers secure single sign-on for intranet and extranet applications by seamlessly integrating J2EE and web platforms with Microsoft Active Directory. For each platform, Centrify delivers a single, easy-to-deploy web SSO module that snaps seamlessly into the Centrify DirectControl Agent on that system. The following table shows all supported web platforms and the host systems upon which they run.

Centrify-Enabled Components

Centrify provides versions of the following popular Open Source infrastructure tools that have been modified to work seamlessly with DirectControl-managed systems. Customers are welcome to download and use these DirectControl-enabled versions of the Kerberos Utilities for free. Support for these utilities is not included as part of the Standard or Premium Product Support plans.

Centrify-Enabled Kerberos Utilities

Centrify's enhanced version of the standard Kerberos Utilities enables ticket-based, single sign-on sessions to UNIX systems.

Centrify Identity Service Supported Platforms

Centrify Identity Service

Centrify Identity Service halts password sprawl with single sign-on, giving organizations centralized control over access to ever-increasing numbers of SaaS applications such as Microsoft Office 365 and thousands of others.

Centrify Identity Service, Mac Edition

 **Supported**  **Recent Addition**  **Early Access**

Operating System	Version	32-bit	64-bit
Apple Mac OS X	10.7, 10.8, 10.9, 10.10 on Intel
