

## Web Transfer Client™

### System Requirements

- Browsers:
  - » Internet Explorer v10 or later
  - » Firefox v29 or later
  - » Chrome v35 or later
  - » Safari v8 or later
- JavaScript must be enabled
- Cookies must be enabled

### Exchange Files with Any Trading Partner

Globalscape's Enhanced File Transfer™ (EFT™) offers a thin client, the Web Transfer Client (WTC), which can be used by any trading partner using virtually any modern Web browser to exchange files. The WTC lowers costs and increases flexibility for your partners, reduces setup and implementation times, needs zero maintenance, and connects from any computer connected to the Internet.

The WTC's small footprint is easy on system resources, and deploys automatically—simply type the WTC web address into the browser.

Partners and clients have their own login and their own folders in which they can upload, download, move, rename, and delete files, pause and resume transfers, and even transfer complete folder structures. With the WTC, file size is not an obstacle.

## WTC Features

The WTC uses a concurrent licensing model to provide organizations with uninterrupted access to critical filesharing systems. When all licenses are actively in use, WTC is still available, but with limited access to advanced features. The table below shows which advanced features are unavailable when all licenses are consumed.

Features	WTC Basic	WTC Advanced
Upload files using File > Upload	Yes	Yes
Download files	Yes	Yes
Rename files	Yes	Yes
Move files	Yes	Yes
Delete files	Yes	Yes
Create sub folders	Yes	Yes
Change view (thumbnails, list)	Yes	Yes
Sort the file list	Yes	Yes
Filter	Yes	Yes
Change password	Yes	Yes
Upload files up to 2GB in size	Yes	Yes
Upload files larger than 2GB in size	No	Yes
Upload using “drag and drop”	No	Yes
Pause and resume transfers	No	Yes
View completed, in progress, and pending transfers	No	Yes
Concurrent file transfers	No	Yes
Transfer entire folder structures	No	Yes
