

Enhanced File Transfer™ (EFT™) SMB and Enterprise

Compare features below to find exactly what you need, or call us – we’re here to help!

EFT is offered in six different bundles or "tiers," as described below. The tiers are organized to meet the needs of small, medium, and enterprise businesses. You are not locked in to these specific groupings. For example, if SMB Tier 2 would meet all of your needs, but you also need a secure proxy server in the DMZ, you can add DMZ Gateway.
