Industry:
Records Storage

Region:
U.S.

Customer Requirements:

- ▶ Malware Protection
- ▶ Network Protection
- ▶ Use Policies
- ▶ HIPAA Compliance

Solution:
iSheriff Web Security
iSheriff Endpoint Security

To ensure the safe and secure storage of private documents like legal charts, medical files, and financial records, many organizations turn to third party facilities like Safesite Inc. Safesite is a an off-site records and media storage management company headquartered in Austin, Texas. With a staff of 145 employees, Safesite has the expertise to handle legal and medical records and the systems to record and track files, boxes and magnetic media.

THE BUSINESS CHALLENGE

Safesite's three member IT team manages the company's 45 computer work stations that are used by 110 employees. According to Jon Frank, Safesite's IT manager, although the information the company stores for customers is paper-based, the security over their network is still "extremely important – Safesite must be HIPAA (The Health Insurance Portability and Accountability Act) sensitive and maintain compliance."

THE SOLUTION

Safesite chose the iSheriff Cloud Security cloud-based Web filtering and endpoint protection solution to safeguard its network and workstations. iSheriff Cloud Security provides Safesite with a safe and secure Internet connection, protection from threats and malware, compliance with HIPAA requirements, and controls on Web browsing to ensure usage is appropriate and in compliance with acceptable use policies.

When data storage facilities like Safesite choose iSheriff to partner with for their IT security needs, they receive a cost effective solution that dramatically simplifies the way their organization stays protected. Benefits of the solution include a single management console with a single set of policies for

“The outcome is a more efficient process – with the iSheriff cloud-based service, we can easily manage our security from a single place. The consolidated approach to reporting saves us time and allows us to focus our efforts on business critical pursuits. Because the solution is so easy to manage, Internet security is no longer placing so much demand on our IT resources.”

SAFESITE INC.

all users, no up-front expenditures, and around-the-clock expert support.

RESULTS

After an implementation process that took only a few days, Safesite “no longer utilizes an on-premise server for management, maintenance and reporting,” said Mr. Frank. “The outcome is a more efficient process – with the iSheriff cloud-based service, we can easily manage our security from a single place. The consolidated approach to reporting saves us time and allows us to focus our efforts on business critical pursuits. Because the solution is so easy to manage, Internet security is no longer placing so much demand on our IT resources,” he said.

Perhaps best of all, Mr. Frank Likes the solution’s effectiveness. “iSheriff Cloud Security has caught more threats than any other security solution that I have come across,” he said.
