iSHERIFF WEB SECURITY

iSheriff Web Security is a cloud-based Internet filtering and Web 2.0 security service. It provides your users with a safe and secure Internet connection, protected from threats and malware, while ensuring that Web browsing is appropriate and complies with your acceptable use policies.

Why do I need Web Security?

Web 2.0 has transformed Internet use from a once static resource into a rich and dynamic collaboration experience. Unlike the past where Websites were tightly controlled, the content of many of today's Websites - like Facebook and YouTube - relies on the contributions of millions of Internet users. The negative effect of this change is that organizations can no longer implicitly trust supposedly 'legitimate' sites as safe and free of malicious content.

Traditional Web security solutions such as URL filtering and signature based anti-virus, while still important, are no longer effective protection on their own. The Web 2.0 environment demands real-time protection which can analyze continuously evolving Web content and keep pace with Web-based applications in a constant state of flux.

Incoming Web threats are not the only concern. With millions of Web users now actively contributing Web content through 'tweets', blogs, webmail, video and social networking sites, organizations need to be monitoring their outbound Web content now more than ever. Most organizations place a special significance on their intellectual property and sensitive data which is susceptible to data leakage via the Web. You need to be certain that Internet use is safe, secure, productive and appropriate..

The Many Advantages of iSheriff Cloud Security

iSheriff provides your organization with a versatile and flexible Web security platform – enabling you to protect your users anywhere and on any Web-capable device. As a hosted solution, iSheriff enables considerable advantages over traditional in-house security solutions:

▸ **Instant Deployment** – connect to the service and you're immediately up and running.

▸ **No Upfront Expenditure** – no need to purchase capital and no obsolete hardware.

▸ **Predictable Costs To Suit Any Organization** – iSheriff Cloud Security has a subscription fee - instead of upfront costs – making security affordable to organizations of all sizes.

▸ **Enterprise-Class Security** – you gain the benefit of top email and Web security infrastructure

Security Made Easy

thanks to economies of scale.

▶ **The Experts Work For You** – your email traffic is managed 24/7 by Internet security experts and modelled against other networks to detect traffic anomalies.

▶ **Save Bandwidth And Resources** – control access to bandwidth heavy sites and applications such as YouTube – which our research has shown to consume 75%-90% of most typical organization's bandwidth.

▶ **Strength In Numbers** – you gain the shared benefits of being part of a larger security community.

▶ **Zero Administration** - No tedious upgrades, no maintenance requirements; you always have the latest and best protection.

Key Features

iSheriff Web Security enables comprehensive security yet is simple and easy to use. Our services target a range of Web-based threats and security concerns:

▶ **Mobile Security** – because iSheriff Web Security is cloud-based, protection and policies can be applied to your users anywhere and on any device – in the office, on the road or at home / on a laptop or workstation.

▶ **URL Filtering** – utilizing a layered approach, the service employs the latest range of Web filtering technologies including real-time content analysis and behavioral modelling in conjunction with over 50 constantly updated categories of millions of websites to enable you to control access to related Web content.

▶ **Anti-Virus & Malware** – the service incorporates traditional anti-virus technology, sophisticated dynamic anomaly detection and behavioral modelling systems to protect your organization from viruses, botnets, spyware, browser exploits and other Web 2.0 threats.

▶ **Application Control** – gain control over popular Web 2.0 applications such as Social Networking, Streaming Media and Web-based messaging.

▶ **Bandwidth Control** – manage your Internet bandwidth consumption and control unnecessary or non-business use. With flexible, policy-based control you can place restrictions on specific users or at particular times of day when you need to ensure you are getting the most from your bandwidth.

▶ **Inbound & Outbound Policy Compliance** – actively monitor your acceptable use policies and ensure appropriate use of Web resources, block inappropriate conduct and prohibited content

which could potentially create legal liability risk and ensure a safe and productive workplace for your employees.

▶ **Security & Compliance Reporting** – access useful and easy to understand reports on your Internet activity and threats. Graphical summaries are provided as well as in-depth reports to help you investigate specific events or user activity. You can run reports by site, category, user, bandwidth and by threat type across a wide range of time periods. iSheriff reports allow you to measure the real benefits of Web Security and demonstrate the return on your dollar.

▶ **Directory Synchronization** – iSheriff provides automated user account directory synchronization to streamline administration and save you time and effort. iSheriff supports all common directory formats including Active Directory and LDAP.

Free Evaluation

It is fast and easy to sign up with iSheriff. You can trial the service before subscribing and generate reports to better understand your own requirements and evaluate iSheriff. Sign up for your FREE trial today. Visit us at: www.iSheriff.com

Full reporting services are provided to help you learn what is going on with your Endpoint, email and Web usage and understand all that iSheriff has to offer. There is no obligation to subscribe and it is quick and easy to disconnect the service if you don't wish to continue.

About iSheriff

iSheriff is the leading provider of content and endpoint security from the cloud. We keep organizations and individuals safe from cybercrime, malware and digital threats. Thousands of businesses across a wide array of industries have deployed our solutions, including some of the most sophisticated buyers of security technology worldwide. iSheriff has operations in New York, California, Ireland and Asia.
