DIGITALGUARDIAN®
Digital Guardian Management Console

› MANAGE AND CONTROL ALL AGENTS FROM ONE CONSOLE

The **Digital Guardian Management Console (DGMC)** is your web-based command center within our Digital Guardian data-centric security platform. It enables you to create and manage policies, alerts, and reports.

Data use policies that you configure in the DGMC are distributed down to and enforced by the DG endpoint agents. The agents send event logs back to the DGMC, which aggregates and analyzes the event data and provides alerts and consolidated reporting.
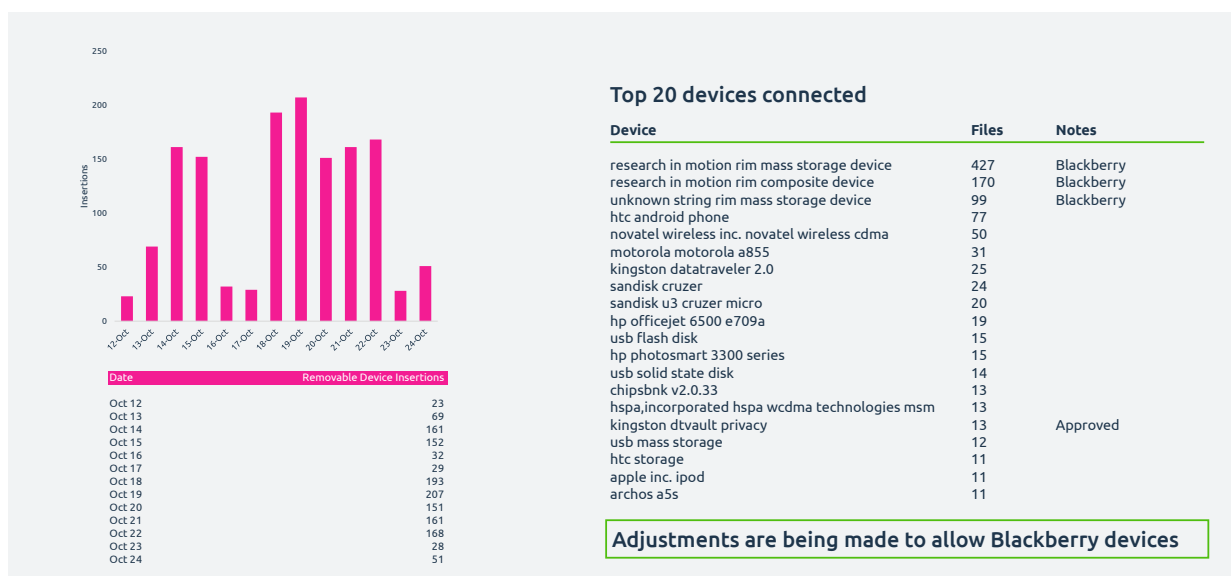

MANAGE AND CONTROL ALL AGENTS – LINUX, MAC OR WINDOWS - FROM ONE CONSOLE
- Manage data security policies to Digital Guardian agents by users, machines or groups.
- Create role-based access controls.
- Capture, aggregate, and store user and data-related activities with full forensic context.
- Set policy-based alerts and email notifications for near- real-time incident response.
- Synchronize with your existing Active Directory or LDAP infrastructure.
- Configure for anonymization of the data to support privacy laws and Worker's Council concerns.
- Monitor application usage and activity.

USE OUR ADVANCED ANALYTICS ENGINE & DASHBOARDS FOR EXECUTIVE, FORENSIC & CUSTOM REPORTS
- View aggregated, high-level snapshots of sensitive data usage and flow across the extended enterprise.
- Drill-down to relevant information at the user, machine, or individual file level.
- Use our integrated case management and forensic capabilities to track data usage by users and groups for targeted investigation. All usage logs are stored as tamper-proof evidence (encrypted and digitally signed) for future validation.
- Integrate Digital Guardian event logs with SIEMs and other event aggregators.

› DIGITAL GUARDIAN PRODUCT PLATFORM

Digital Guardian is the only data-centric security platform designed to stop data theft.

DGMC
Digital Guardian
Management Console
Your web-based command center. Deploy agents, create and manage policies, alerts and reports.

Advanced Threat Protection
Advanced threat detection, incident response and prevention that ensures security travels with the data.

Data Loss Prevention
Everything you need to stop sensitive data from getting out of your organization.

Data Visibility & Control
Out-of-the-box data visibility and device control.

DG Agent
The only endpoint agent compatible with Windows, Mac & Linux.

ABOUT DIGITAL GUARDIAN

Digital Guardian is the only data-centric security platform designed to stop data theft. The Digital Guardian platform performs across traditional endpoints, mobile devices and cloud applications to make it easier to see and stop all threats to sensitive data. For more than 10 years we've enabled data-rich organizations to protect their most valuable assets with an on premise deployment or an outsourced managed security program (MSP). Our unique data awareness and transformative endpoint visibility, combined with behavioral threat detection and response, let you protect data without slowing the pace of your business.
