AVA

Solutions

Data loss protection solution using minimal CPU

Ava Reveal helps your team detect data exfiltration and loss at a cost-effective price point with no hidden costs, running a lightweight agent using minimal CPU, and is easy to deploy and use.

Why Ava?

Light agent with extensive capabilities

The lightweight Reveal Agent has minimal impact on employees' productivity, performing incident-based training, advanced content inspection, policies, machine learning, and automated enforcement with efficient CPU usage.

Policy and machine learning

Combining these two powerful methods of detection, regardless of an employee being offline or remote. This combination analyzes more user scenarios and detects more incidents–resulting in faster threat remediation.
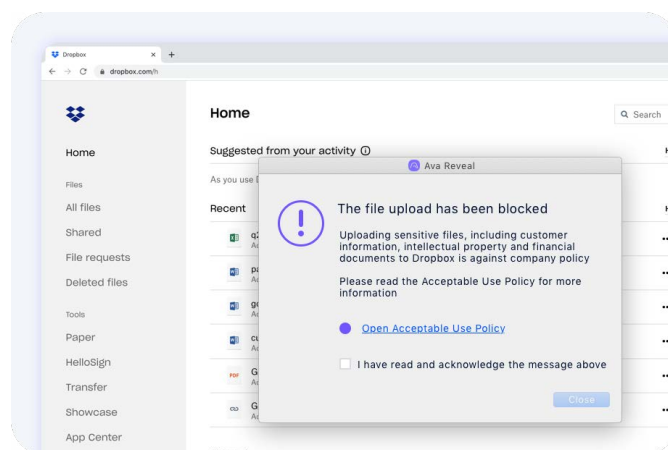

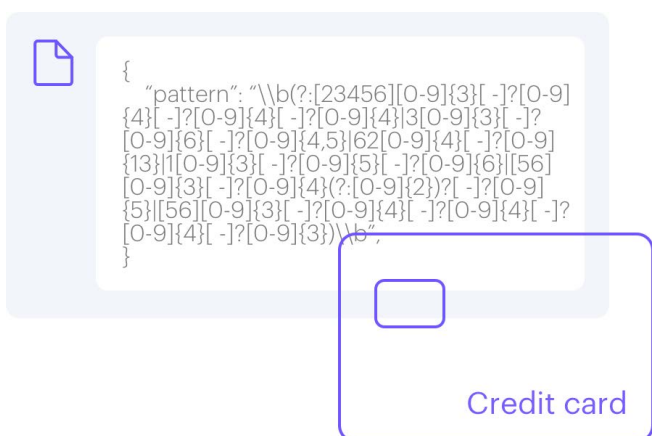

Advanced content inspection

Track file movement on and across systems and browsers with advanced content inspection to protect against data loss. Patterns include credit or debit card numbers, identity card numbers, insurance numbers, social security numbers, and national health service numbers.

Automated enforcement

Constant enforcement without exception–whether they are remote or working offline. Enforcing employee adherence to corporate policies such as Acceptable Use Policy (AUP), Information Security Policy (ISP) and more.

Key benefits, delivered

Simple and secure

- Easy to deploy the lightweight Reveal Agent
- Simple to use with an intuitive user experience
- Robust security controls and anti-tamper measures across the solution and the Reveal Agent

Remove the burden on the users

- Use advanced content inspection and automated response to block data exfiltration attempts
- Educate users on IT security policy and compliance to protect against data exfiltration while efficiently using CPU resources.

Identify and mitigate more risks

- Improve cyber hygiene and keep data and endpoints secure, regardless of location.
- Combine the power of machine learning and rule-based policies
- Detect risks and enforce behavior with actions, regardless of an employee being offline or remote

Understand the risk to systems and data

- Attribute all collected data and user activity to specific users
- Assess how different types of user activity adds to risk
- Understand when to implement additional security measures

Your human-centric security solution awaits

Ava Reveal

Ava Reveal helps you understand human and device behavioral patterns in real time. Strengthen your defense against insider risks–malicious, careless, and accidental. Make your static IT policy come alive, close compliance gaps, and protect against data loss.

Ava Analyst Services

Identify and manage risk and vulnerabilities with the help of Ava Cyber Analysts. Our experienced cybersecurity specialists have a strong background in security monitoring, CIRT, and incident response, and provide risk assessment reports tailored to each organization.

Simple and flexible licensing

Ava uses a cost-effective, straightforward subscription model including services and software upgrades without hidden cost.

AVA

Unified Security

Ava exists because we believe that we can create a better, smarter way to deliver security. We inject intelligence into our approach to security and all our solutions. We help organizations get the whole picture of their surroundings to protect their people, business, and reputation in real-time.
